Background

The City of Delray Beach's Historic North Swinton Avenue is experiencing pavement deterioration including uneven surfaces of the roadways, asphalt cracking and accelerated deterioration adversely impacting roadway stability and rideability. This has increased maintenance and shortened the lifespan of resurfacing projects. Utility infrastructure within the corridor is at varying levels of age and condition and any required utility upgrades are to be incorporated into the design of the improvements as part of this project.

WHERE WE ARE AT NOW:

The Project is at the 90% design documents stage. We are anticipating 90% construction documents in January 2023.

Construction for Phase I is scheduled to begin in Spring 2023 and be completed Fall 2023.

Phase II construction is scheduled to begin in Spring 2024 and will be completed in Fall 2024.
